

Nordic Independent Living Challenge Prize Ceremony

9 June, Oslo

The five Nordic capital cities and Nordic Innovation breaks new ground to solve one of the biggest challenges our societies face.

Join us in Oslo to celebrate the winners of the Nordic Independent Living Challenge!

In February 2015, the five Nordic capital cities Copenhagen, Helsinki, Oslo, Reykjavik and Stockholm launched the Nordic Independent Living Challenge innovation competition together with Nordic Innovation. The aim was to meet the shared challenge of an ageing population and an increase in chronic disease.

We invited innovators from all the Nordic countries to develop solutions that make it possible for elderly citizens and citizens with disabilities to live independently in their own homes. From the stunning 415 ideas that were submitted to the competition, we are now left with five finalists who will compete for the main prize of **one million NOK**. We will also award prizes for the best student team, as well as for the best cross-Nordic team.

If you work with health and welfare solutions in a Nordic municipality or government, work in care, use health and welfare solutions, are an investor or simply just interested in how you can develop innovative new health and welfare solutions, you should save the date and join us in **Oslo 9 June 2016** in the afternoon.

Please register here to show your interest and receive updates about the event!

Also join:

You can also join the Nordic Business & Living Lab Alliance workshop 9 June in Oslo from 10.00 to 13.00 to learn more about living labs and Nordic collaboration on developing health and welfare solutions. For more information, please visit www.livinglaballiance.org (separate registration).
